Summary

Full Stack Developer with experience in Web Development and a 3-month contribution to a live CRM project, gaining practical experience in real-world software development, feature implementation, and team collaboration.

Education

Government Engineering College Bhavnagar Bhavnagar, Gujarat
Bachelor of Engineering in Information Technology - CGPA: 9.07 *2022 – 2026*

St. Xavier School Kachchh, Gujarat
Higher Secondary (12th Science) - 76% *2021 – 2022*

Experience

Junior Software Developer *Ahemdabad*
eSparkBiz Technologies *Jan 2026 - Present*

- Gained practical experience in full-stack development, strengthening technical skills and understanding of software development practices.
- Contributed to the live Smackdab CRM project, gaining hands-on experience with React.js, NestJS, TypeScript, and PostgreSQL.

Software Development Trainee
Tatvasoft *July 2025*

- Worked on web development tasks involving Angular, .NET, and PostgreSQL.
- Practiced building web application features and integrated the frontend with backend services.

AI/ML Intern
Intel AI for Manufacturing *March 2025 - July 2025*

- Applied Python and machine learning techniques to solve manufacturing-related problems.
- Developed an AI-powered packaging defect detection system using Python and YOLOv8 for real-time defect identification.

Projects

Event Hub | *React, NestJS, Sequelize, PostgreSQL, RabbitMQ* *Link*

- Developed a full-stack event management platform with secure authentication, role-based access control, event creation, and registration workflows.
- Implemented asynchronous booking, capacity management, and notifications, and documented APIs using Swagger.

Taskora | *React, Node.js, Express.js, TypeScript, MySQL, Prisma* *Link*

- Built a project and task management system with workspace collaboration, task assignments, priorities, labels, due dates, and status tracking.
- Implemented dynamic role-based permissions, secure authentication, and OTP-based password recovery.

Tiffin Wallah | *React, Node.js, Express.js, MongoDB* *Link*

- Developed a food ordering platform connecting customers with service providers offering affordable, home-cooked meals.
- Implemented role-based access, secure authentication, and REST APIs, and deployed the application online.

Technical Skills

Languages: Java, JavaScript, Python, C, TypeScript, HTML, CSS

Frameworks & Libraries: React.js, Node.js, Express.js, NestJS, Prisma, Sequelize, Mongoose, RabbitMQ

Databases: MySQL, PostgreSQL, MongoDB

Agentic AI: AI Agents, Skills, Sub-agents, MCP Servers, Gemini, OpenAI Codex, Claude

Tools: Git, GitHub, Swagger, Postman, Render
